

Rhamnus frangula 'Fine Line'® (Fine Line® Buckthorn)

A narrowly upright, deciduous shrub with grass-like foliage. Dense branching reaches the ground and can create a screen or hedge that doesn't need trimming. A great accent or focal point. Pest, disease and deer resistant!

Sequoiadendron giganteum 'Glaucum' (Blue Giant Sequoia)

An upright, evergreen conifer with blue-green needles. Slower growing, with a narrower habit and hardiness than the straight species. Use this as a grand specimen or as a tall windbreak.

Taxus x media 'Flushing' (Flushing Hybrid Yew)

Upright, evergreen conifer with fastigate branching and very narrow habit. Shiny, dark green foliage is beautiful year-round. A female form that produces bright-red, berry-like cones. Very attractive.

Thuja plicata '4Ever' PP19267 (Forever Goldy)

An upright, evergreen conifer with conical habit. Tight, compact growth and brilliant yellow foliage that doesn't burn in full sun. Winter color features orange highlights that are beautiful against the dark red stems. A great choice as a specimen or for use as a hedging plant.

2022 NEW VARIETIES

Abies nordmanniana 'Pendula' (Weeping Nordmann Fir)

An upright, evergreen conifer with pendulous branches that hang almost completely vertical. This irregular grower can be trained to grow and develop into almost any shape you would like. New growth is bright green and soft to the touch, darkening with maturity.

Acer campestre (Hedge Maple)

This is a small, upright deciduous tree with a round habit. Densely branched, this tree can take considerable pruning. It may be pruned to form a tall hedge or is a great choice as a street tree for shade. Fall color is typically yellow.

Cedrus deodara 'Sander's Blue' (Sander's Blue Himalayan Cedar)

An upright, evergreen conifer. The needles emerge a bright, frosty-blue and look striking against the steel-blue mature foliage. The habit of this interesting variety is an open, pyramidal, alpine look. This is one of the most cold-hardy Himalayan Cedars.

Chamaecyparis nootkatensis 'Sparkling Arrow' (Sparkling Arrow Alaskan Cedar)

A very narrow, upright, heavily weeping, evergreen conifer. The foliage is green dappled with sparkling white variegation. This plant was discovered as a sport of 'Green Arrow' by Buchholz & Buchholz Nursery. A gorgeous accent plant for the garden.

Ginkgo biloba 'Baldii' (Baldii Ginkgo)

A dwarf, upright deciduous conifer with a round habit and miniature leaves. Only growing around 5-10" per per year, this gorgeous Ginkgo can find a place in almost any garden. The foliage emerges a pretty bluish-green, maturing to a grey-green. Fall color is a blinding yellow.

Hibiscus syriacus 'Gandini Santiago' PP25568 CPBRA (Proven Winners® Color Choice® Purple Pillar® Rose of Sharon)

An extremely unique Rose of Sharon that is tall with a very narrow footprint. The blooms are semi-double with purple petals and deep-red centers. Beginning in summer, each stem is flooded along the entire length with blooms. A great choice as a screen or hedge, in a container, or flanking a doorway or garden entrance.

Juniperus scopulorum 'Candelabra' (Candelabra Rocky Mountain Juniper)

An upright, evergreen conifer with branches that slope down and then back upward again at the tip, much like a candelabra! Bright, silvery-blue foliage is very eye-catching and contrasts beautifully against other plants. This Juniper is a great choice to survive under tough conditions and is quite easy to grow.

Picea abies 'Columnaris' (Columnar Norway Spruce)

A narrow, columnar evergreen conifer with dark-green needles. Densely branched and rarely in need of pruning. This Spruce is so tall and narrow, it is a wonderful choice as a windbreak, privacy screen or focal point. This tough plant can withstand heavy snow loads as well as heat and humidity.

Picea pungens 'Blue Diamond'

(Blue Diamond Colorado Blue Spruce)

An upright, evergreen conifer with a nice pyramidal habit. Very intense and vibrant silvery-blue color that doesn't fade! An excellent choice as a focal point in any garden.

Pinus mugo 'Big Tuna' (Big Tuna Mugo Pine)

A large, upright, evergreen conifer with a broadly-conical habit. This multi-stemmed bush grows taller than wide and offers bold texture and showy buds. Excellent as an accent or can be used as a hedge or screen.

Pinus sylvestris 'Green Penguin' (Green Penguin Scotch Pine)

A dwarf, upright evergreen conifer. Super dense growth of thick needles and a miniature size, plus excellent cold hardiness are what gives this plant it's clever name of 'Green Penguin'. A fun specimen for your favorite planting bed.

Pseudotsuga menziesii 'Whiskey Hill' (Whiskey Hill Douglas Fir)

A narrow, upright, evergreen conifer with an irregular branch habit. This is a very unusual form of the Douglas Fir with short needles on contorted branches. The cones are also much smaller than the straight species. A very rare, fun specimen with unique ornamental qualities.
